

Heatguard® 110-HX Series

The Heatguard® 110-HX is a Temperature Actuated Mixing Valve that mixes hot water with cold to deliver hot water at a reduced temperature.

The Heatguard® 110-HX has an outlet temperature range extending to 176° F (80° C), making it ideal for application in heating systems or in any installation requiring the delivery of reduced temperature hot water.

- High flow rate design for lower pressure losses within the system: *More efficient system performance for lower running costs.*
- Every valve is tested prior to shipping: *Specify and install with confidence!*
- Robust, low complexity construction: *Superior reliability, improved user safety.*
- Integral union connections on all three ports: *Easy and quick to install and service.*
- Adjustable and lockable handle: *Minimizes unauthorized tampering with valve setting.*
- Listed by IAPMO and ASSE: *Inspector friendly, peace of mind!*
