

Retrofit/Vinyl Adapter Kit Installation Instructions

WARNING: TURN OFF ELECTRICAL POWER SUPPLY AND NATURAL GAS OR PROPANE SUPPLY TO THE HEATER BEFORE PROCEEDING WITH HEATER INSTALLATION

Instructions for Use as Vinyl Adapter Kit:

1. Install the EuroTherm vent adapter. Rotate the adapter so one of the three mounting holes for the vent is pointing up. Use caulk and flashing as required. See Figure 1.
2. Install the EuroTherm heater using the installation instructions in the technical manual supplied with the EuroTherm heater. When preparing the air inlet tube and vent tube, refer to Figure 2 for guidance on the measurement of the Dimension "A" shown in the manual.
3. After installing the air inlet tube, vent tube and the heater, install the vent onto the vent adapter plate using the three sheet metal screws supplied with the kit. See Figure 3.

Retrofit/Vinyl Adapter Kit Installation Instructions

WARNING: TURN OFF ELECTRICAL POWER SUPPLY AND NATURAL GAS OR PROPANE SUPPLY TO THE HEATER BEFORE PROCEEDING WITH HEATER INSTALLATION

Instructions for Use as Retrofit Adapter Kit:

1. After electrical and gas supply utilities have been turned off and disconnected, remove the existing heater. Remove the outside vent from the existing vent adapter plate, then remove the vent adapter. See Figures 4 and 5.
2. Install the EuroTherm vent adapter. Rotate the adapter so one of the three mounting holes for the vent is pointing up. Use caulk and flashing as required. See Figure 6.
3. Install the Eurotherm heater using the installation instructions in the technical manual supplied with the Eurotherm heater. When preparing the air inlet tube and vent tube, refer to Figure 7 for guidance on the measurement of the Dimension "A" shown in the manual.
4. After installing the air inlet tube, vent tube and the heater, install the vent onto the vent adapter plate using the three sheet metal screws supplied with the kit. See Figure 8.
